

EURODEUR- ECGP'6 - France - Marseille 2007

14th EURODEUR EDITION welcomes the VIth International Symposium ECGP'6 on Environment, Catalysis and Process

P R E S S R E L E A S E

**During three days, Marseille will be the opening gate of Europe towards
the Euro Mediterranean Area**

Columns:

Exhibitions / Congress / Schedule
Events

Atmospheric pollution

Environment / Air / Analysis

Electronic noses, simulation

Smokes treatment

Recycling / Measurement / Control

Regulations / Right and health

Settlement and health, Air and health

Key words:

Air quality: atmospheric dispersion,
analysis, regulation and normalisation

Odours: Olfactometry, sensor and
micro sensor, electronic noses and
physico-chemical measure, mass
spectrometry

Catalysis: catalytic systems, oxida-
tion, photocatalysis, SCR, hete-
rogenous catalysis

Treatment processes: - gas wash-
ing, ceramic filter, filter handle
and electrostatic precipitator
-biological treatment, membrane
process, biological breakdown,
thermal oxidation, adsorption,
coupling

Chemical engineering

Management of solid waste: recy-
cling, valorization of waste and
composting

The organizing committee cordially invites you to attend EURODEUR-ECGP'6, which will be held the 26th, 27th and 28th of June 2007 in Marseille. Organized by the Moroccan Association of catalysis and environment (AMCE). This edition gathering more than twenty country aims at the development of sciences and technology relating to the environment and the creation of connections with other associations and national and foreign scientific organizations.

The growing interest in Environment, Catalysis and Process Engineering (ECGP) coupled to the specific focuses of EURODEUR – air quality control, odour characterization and control, abatement technologies of pollution generated by industries, solid and liquid (water) waste handling - has encouraged us to organise the Sixth international symposium for the first time in France.

IT WILL BE THE FIRST TIME THAN A TRANSMEDITERRANEAN ORGANISATION is welcoming Mahgreb and Middle East on the European territory. It will include seven half-day sessions dealing with the latest researches in these fields and discussions about the future.

EURODEUR-ECGP'6 Congress and Exhibition

AIR QUALITY : indoor, outdoor, measurement, protocol, standardisation (state-of-the art)

ODOURS and ODOURITY: indoor, outdoor, characterisation, protocol, impact studies including olfactometry and electronic noses.

CATALYSIS applied to the Environment for gaseous and liquid phase in which VOC oxidation, NO_x removal, ozonia and ammonia destruction

TREATMENT PROCESSES: -for air, water, BIOGAS purification (membrane, biological, oxidation, ...)

- flue gas treatment for solid waste management including DEDUSTING, DRY and SEMI-DRY processes, DeNO_x and DeDIO_x, DeSO_x

CHEMICAL ENGINEERING applied to the Environment

SOLID WASTE CONTROL

Environment, Catalysis and Treatment Processes

From the 26th to the 28th of June 2007—World trade Center—Marseille

An exhibition will be held at the same time and will be the meeting place for the industrials of Environment and the economical actors of the mediterranean countries area.

Organization committee :

*Chairman: A.KHERBECHÉ, Université de Fès; Vice chairman
S.VIGNERON, HOBIOFILTER*

*P.COMPAIN, LESNI; Houda ROCHDI, ODESSA Environment;
J.L.FANLO, Ecole des Mines d'Alès,*

*J.N.JAUBERT, IAP SENTIC; L.POURTIER, EO; T.TALOU,
ENSCT; Commissaire: K.RUEL, HARBOUR;*

Organisation: HARBOUR CONFERENCES BP 80126—35801 DINARD CEDEX
